Print length : 368 pages

This book provides a comprehensive overview of NLP, from its fundamentals to the latest research frontiers. It covers a wide range of topics, including:

- Text classification
- Sentiment analysis
- Machine translation
- Dialogue generation
- Neural networks for NLP
- Deep learning for NLP
- Transfer learning for NLP
- Evaluation of NLP systems

The book is written by a team of leading researchers in the field, and it is an essential resource for anyone who wants to learn about NLP.

## Table of Contents

- 1.
2. Text Classification
3. Sentiment Analysis
4. Machine Translation
5. Dialogue Generation
6. Neural Networks for NLP
7. Deep Learning for NLP
8. Transfer Learning for NLP
9. Evaluation of NLP Systems
- 10.

## Reviews

"This book is an excellent overview of NLP, from its fundamentals to the latest research frontiers. It is written by a team of leading researchers in the field, and it is an essential resource for anyone who wants to learn about NLP." - **Professor X, University of California, Berkeley**

"This book is a must-read for anyone who wants to learn about NLP. It covers a wide range of topics, from the basics to the latest research frontiers. The authors are all experts in the field, and they provide a clear and concise explanation of the material." - **Dr. Y, Stanford University**
